VISUAL SIGNATURES

Use the exact delivered masters described on the Logo system sheet. Formal colors and their measured uses are on the Color sheet. Display Space Grotesk, body Geist, and mono Geist Mono are the declared type families.

Where each asset belongs: The Asset catalog lists verified marks, lockups, icons, and platform deliveries by intended surface and size.

USAGE LIMITS

Keep delivered artwork geometry unchanged. The Usage limits sheet lists every source rule.

Do not substitute the rejected LC monogram or W placeholder packaging icon.

Mark: The calm orbit places a centered disc inside two open bands. The open shape suggests an owner-controlled space with room for different companions. A thicker Reduced master keeps the same center and opening clear at small icon sizes.

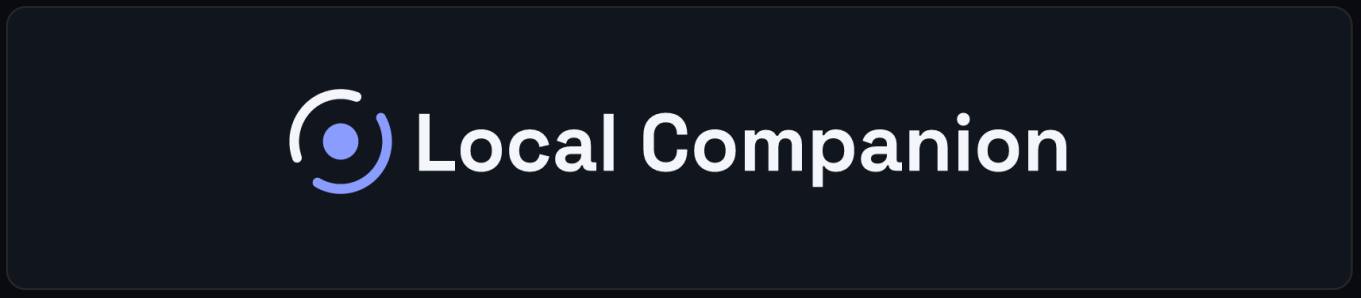

Color: Graphite provides a quiet desktop canvas and indigo carries the product identity. Use the accessible darker indigo on light surfaces. Functional interface cues are measured separately and include text, shape, or control-state cues.

LOGO SYSTEM

Marks and lockups

The calm orbit places a centered disc inside two open bands. The open shape suggests an owner-controlled space with room for different companions. A thicker Reduced master keeps the same center and opening clear at small icon sizes. Mark means symbol; wide and stacked lockups are separate. Clear means transparent; light and dark name the viewing surface. See Asset Language in the main manual.

Clear space

One clear-space unit on every side: 48 units on the 512 × 512 canvas, 11.7 percent of artwork width. No text, border, icon or crop enters that band.

MINIMUM SIZE

mark	24 px
horizontal	160 px
stacked	128 px
wordmark	120 px

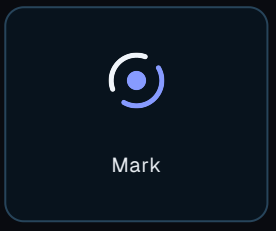

Below 32 px the reduced master takes over. It ships as its own file. Do not rasterize the full mark down at runtime.

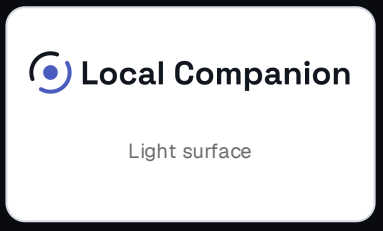

Fixed lockup proportions

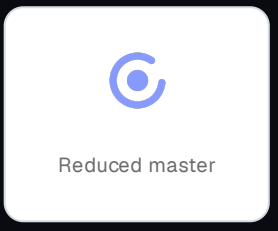

LOCKUP	MARK HEIGHT	GAP	ALIGNMENT
Horizontal	160 units	34 units	Optical center
Stacked	1.80C	0.45C	Centered on wordmark ink width

The horizontal row records its approved master composition. C is the outlined wordmark cap height used by the stacked lockup. X is the clear-space unit declared above. Keep one X clear around every master and never resize the mark and wordmark independently.

LOGO SYSTEM

Usage limits

These are the exact source usage rules for this identity. The preceding Logo system sheet gives measured sizes and clear space.

1. Do not substitute the rejected LC monogram or W placeholder packaging icon.
2. Do not combine companion character imagery with the product mark.
3. Do not rotate, skew, stretch, outline, bevel, or glow the mark.
4. Use the reduced master at and below 32 pixels.

Additional visual boundary

Local Companion is the workspace identity. A companion portrait or conversation belongs to its own context and should not become the default product mark or a public sample without separate approval.

Delivered horizontal lockup

Delivered reduced mark

COLOR

Palette

Graphite provides a quiet desktop canvas and indigo carries the product identity. Use the accessible darker indigo on light surfaces. Functional interface cues are measured separately and include text, shape, or control-state cues.

Role colors on dark surfaces

muted-foreground
#4D5670

LIGHT SURFACES

The bright accent #8B9CFF measures **2.38:1** on the light reading surface and is never text there. The light token block substitutes #4B5CC0 at 5.51:1 automatically. The legal foreground on an accent fill is #000000 at 8.3:1. Every fill token in brand.json carries its measured foreground.

SEMANTIC USE

COLOR	MEANS
Accent	Primary value, selection, links, focus
Emphasis	Needs attention, threshold exceeded
Destructive	Failed or timed out. Always with text.

COLOR VISION

The emphasis and failure colors may not be reliably separable under deuteranopia. That is acceptable only because state is never carried by color alone: every state ships a written label.

COLOR

Chart colors

Chart colors serve data visualization. Brand applications use the identity accent and the neutral surfaces. Each chart color is derived from the identity accent and measured against its surface so every entry clears 4.5:1.

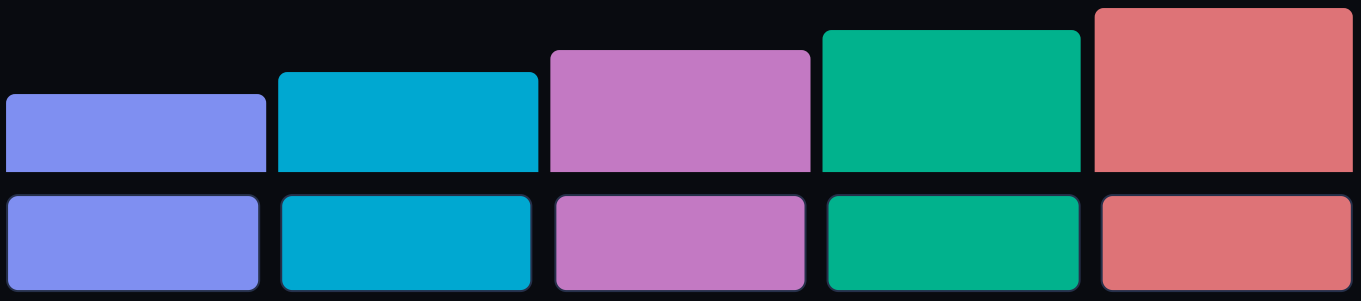

chart-1	chart-2	chart-3	chart-4	chart-5
#7F8FF1	#00A8D1	#C379C3	#01B28D	#DE7377

CONTRAST CHECKS

Lightness is calculated separately for dark and light surfaces. Data charts also use labels or shapes; hue alone does not carry meaning.

THE SAME PALETTE ON THE LIGHT READING SURFACE

chart-1	chart-2	chart-3	chart-4	chart-5
#4B5CC0	#00738D	#8F4595	#007A5D	#AA3C4A

DERIVED VALUES

SERIES	DARK	LIGHT
chart-1	#7F8FF1	#4B5CC0
chart-2	#00A8D1	#00738D
chart-3	#C379C3	#8F4595
chart-4	#01B28D	#007A5D
chart-5	#DE7377	#AA3C4A

RULES OF USE

Series order is fixed: chart-1 is always the primary measurement. Never reorder to make a chart look better. Never introduce a sixth color; past five series, switch to a form that does not depend on hue. A series never uses the semantic emphasis or failure colors, because those carry state.

TYPOGRAPHY

Display, interface, code

Local Companion uses three approved type families. Space Grotesk handles display text, Geist handles interface and reading text, and Geist Mono is reserved for literal command blocks.

Local Companion

ROLES

FUNCTION	TYPEFACE	WEIGHTS
Display, headings	Space Grotesk	500, 700
Body, interface	Geist	400, 500
Literal code blocks	Geist Mono	400

GEOMETRY

AXIS	VALUE
Radii	6 / 8 / 12 / 16 / pill
Spacing	4 8 12 16 24 32 48 64 96 120
Focus	2px ring at 2px offset

AVAILABLE WEIGHTS

Only the listed local faces are approved. Any other weight makes the renderer synthesize a faux bold, which prints badly and forces outlined glyphs into exported PDFs. Courier Prime is used only for literal command blocks.

SCALE, DISPLAY

TOKEN	SIZE	TRACKING
display-xl	72	-0.030em
display-lg	56	-0.025em
display-md	40	-0.020em
display-sm	28	-0.015em
display-xs	20	-0.010em

SCALE, READING

TOKEN	SIZE	LEADING
body-lg	18.4	1.6
body-md	16	1.7
body-sm	14	1.6
body-xs	12	1.5
eyebrow	12	0.12em caps

PARENT

A ShruggieTech project

Local Companion declares ShruggieTech parentage. Palette sharing and typography are separate explicit choices. The approved mark and colors remain this brand's own source decisions.

A SHRUGGIETECH PROJECT

The approved mono family, uppercase, positive tracking. Visually subordinate and outside the logo clear space. Never a combined parent-product lockup.

Load the system

```
npx shadcn@4.21.0 registry add @local-companion=https://brand.shruggie.tech/local-companion/brand/r/{name}.json
npx shadcn@4.21.0 add @local-companion/theme
npm i next-themes
```

The catalog lists installable theme and component items. For offline fonts, copy nextjs/fonts.ts and fonts/ together from the kit.

tokens/	CSS and JSON with measured contrast	6

PATH	CONTENTS	N
nextjs/	globals.css, shadcn registry, fonts, provider	9
enforcement/	AGENTS.md, ESLint, stylelint	21
qc/	Contact sheets. Proof somebody looked.	162
guidelines/	The system rendered from itself	2

Independent decisions

DECISION	DECLARATION
OWNERSHIP	ShruggieTech owned
PARENT	ShruggieTech
PALETTE	Brand-specific emphasis and action
TYPOGRAPHY	House families

COLOR ROLES

Interface color cues

Colors for actions and states are distinct from formal identity artwork. A shared HEX is a deliberate choice; meaning also uses words, icons, outlines, or state attributes.

Formal identity colors

COLOR	HEX	SOURCE	USE
COMPANION INDIGO	#8B9CFF	brand.accent.bright	Primary mark and identity accent
GRAPHITE MARK INK	#F4F6FB	brand.logo.role_colors.color.ink	Full mark and wordmark on dark surfaces

Approved combinations and artwork

APPLICATION	COLORS AND ARTWORK	USE
LOCAL COMPANION ORBIT	primary, ink in logo.full	Split orbit and centered core on graphite

Correct: use Companion indigo (#8B9CFF) in approved identity work; pair the Warning cue (#F2BD68) with warning text and icon. Misuse: a lone identity swatch as the only warning signal.

CUE	PURPOSE	DARK AND LIGHT PAIRING	ADDITIONAL CUE
Action	Primary interactive action	Dark: #4B5CC0, #FFFFFF text 5.85:1; surface 3.37:1 Light: #4B5CC0, #FFFFFF text 5.85:1; surface 5.51:1 Source: semantic.action / semantic.action	A descriptive button or link label
Warning	Attention or recoverable risk	Dark: #F2BD68, #000000 text 12.25:1; surface 11.49:1 Light: #8A5600, #FFFFFF text 6.15:1; surface 5.80:1 Source: brand.functional_colors.warning.dark / brand.functional_colors.warning.light	Warning text and icon
Error	Failure or destructive action	Dark: #FF7B91, #000000 text 8.49:1; surface 7.96:1 Light: #B32D4A, #FFFFFF text 6.19:1; surface 5.83:1 Source: brand.functional_colors.error.dark / brand.functional_colors.error.light	Error text and icon
Success	Completed operation	Dark: #63D6AD, #000000 text 11.75:1; surface 11.01:1 Light: #08704A, #FFFFFF text 6.13:1; surface 5.77:1 Source: brand.functional_colors.success.dark / brand.functional_colors.success.light	Success text and icon
Information	Neutral information or help	Dark: #70B8FF, #000000 text 9.99:1; surface 9.36:1 Light: #1B5EAB, #FFFFFF text 6.49:1; surface 6.12:1 Source: brand.functional_colors.information.dark / brand.functional_colors.information.light	Information label and icon
Focus	Keyboard focus ring	Dark: #8B9CFF, #000000 text 8.30:1; surface 7.78:1 Light: #4B5CC0, #FFFFFF text 5.85:1; surface 5.51:1 Source: brand.accent.bright / brand.accent.accessible	Visible outline and keyboard focus order
Selection	Selected control or item	Dark: #8B9CFF, #000000 text 8.30:1; surface 7.78:1 Light: #4B5CC0, #FFFFFF text 5.85:1; surface 5.51:1 Source: brand.accent.bright / brand.accent.accessible	Selected label or checked state
Disabled	Unavailable control	Dark: #A8B5FF, #000000 text 10.72:1; surface 10.05:1 Light: #A8B5FF, #000000 text 10.72:1; surface 1.85:1 Source: brand.accent.dim / brand.accent.dim	Disabled attribute and text
